

STELLA WIFI ADAPTER

PRODUCT FEATURES

Meet Stella. The device that allows you to wirelessly control your telescope. Astronomers now have a graphical interface for navigating the night sky.

Use Stella with 2 simple steps:

1. Connect Stella to your GoTo telescope using the USB or Serial ports
2. Use StellaAccess to direct your scope to desired celestial object

The Stella Wi-Fi Adapter features:

- Wireless hotspot
- Web server for configuring Wi-Fi parameters such as security, passwords and SSID
- Power saving mode to extend battery life
- Velcro tape for affixing device to mount or tripod
- Access to planetarium database for locating and learning more about stars, planets, celestial bodies and more
